EDUCATION

- Department of Computer Science, Gujarat University
MCA (Master of Computer Applications) Ahmedabad, Gujarat 2024 - 2026
- Som-Lalit Institute of Computer Application, Gujarat University
BCA (Bachelor of Computer Applications) Ahmedabad, Gujarat 2020 - 2023

TECHNICAL SKILLS

- Programming Language : Python(Pandas, Numpy, Scikit-learn, Matplotlib, Seaborn), C++, Java, C#, JavaScript, SQL
- Frameworks & Libraries : Django, Rest API, .NET Core, ASP.NET MVC, Web API ORMs: Entity Framework, TensorFlow, Keras, OpenCV, PyTorch (basic)
- Machine Learning & AI : Supervised & Unsupervised Learning, EDA, Feature Engineering, Model Evaluation, Data Preprocessing, Computer Vision (Image Classification, Image Processing, Object Detection-basics), Deep Learning (ANN, CNN, RNN, Regularization)
- Mobile Development : Android Development (Java/Kotlin), Flutter (Dart)
- Tools : VS Code, Jupyter Notebook, Google Colab, GitHub

PROJECTS

California Housing Prediction - Python, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, StandardScaler, LinearRegression.

- Built a regression model to predict median California house prices. Census dataset from Scikit-learn.
- Conducted exploratory data analysis (EDA), visualizing feature relationships using scatter plots and correlation heatmaps.
- Standardized data and trained a Linear Regression model, achieving an R^2 score and low MSE on the test set.
- Interpreted model coefficients to understand the impact of income, location, and housing features on pricing.

Sales Forecast Prediction - Python, pandas, matplotlib, seaborn, scikit-learn, XGBoost.

- Built a sales forecasting pipeline using Python, incorporating data preprocessing visualization (matplotlib/seaborn), and lag-based feature engineering.
- Trained an XGBoost regression model (via scikit-learn) that accurately predicted daily sales using historical sales lags.
- Validated the model using train-test splits that respected time order, and evaluated performance with RMSE—demonstrating practical forecasting capabilities using open-source tools.

HOBBIES

- Chess • Cricket • Coding
